

HAVE ALL YOUR DEVOPS TOOLS INTEGRATED AND DELIVERED AS SAAS

Satisfy your security and compliance requirements by running your DevOps tools on the iTMethods DevOps SaaS Platform. We integrate JFrog, Atlassian, CloudBees, GitHub, and other DevOps tools in a seamless toolchain deployed on our Platform.

Here are some of the most common DevOps challenges we address:

MEETING SECURITY/DATA COMPLIANCE

You may have sensitive data that prevents your team from utilizing your DevOps tools in a multi-tenant environment. You want the benefit of SaaS, but have specific security requirements.

NEED FLEXIBILITY TO OPERATE IN A HYBRID ENVIRONMENT

You require a solution that supports hybrid deployments to on-premise servers and to public clouds.

DEVOPS ADOPTION AND ENABLEMENT

You face challenges adopting DevOps; we provide expert services, driving seamless integration and operational success.

WHAT IS THE DEVOPS SAAS PLATFORM?

SAAS MODEL - BEHIND YOUR FIREWALL

Run all your DevOps tools and apps behind your firewall as a service in a single-tenant environment on public cloud

INTEGRATED TOOLCHAIN

We work with you to integrate all your DevOps tools and provide you with a seamless enterprise toolchain.

ENTERPRISE FEATURES

We provide additional features such as hybrid transit connector, low-cost disaster recovery, highly available and scalable architecture, escalated security patching, and self-service user onboarding.

We Allow You to Focus On Your Core Business, Not Your DevOps Tools

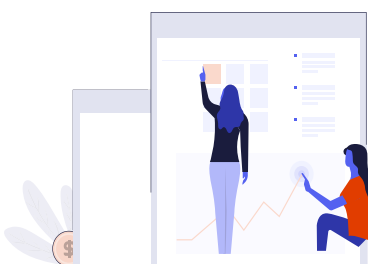

**We are trusted by many of the world's leading organizations.
