# iTmethods

Identify gaps, opportunities for consolidation, & cost savings

Deliver high-quality code with confidence

This workshop is designed to identify gaps and inefficiencies within your current toolchain, offering **actionable insights** and best practices for optimization. By highlighting opportunities for **consolidation and cost savings,** this assessment not only enhances the maturity of your DevOps practices but also delivers strategic recommendations to **streamline operations and reduce expenses.**

Partner with iTMethods to elevate your DevOps toolchain, ensuring a more secure, efficient, and cost-effective approach to software delivery.

Components of the workshop

Toolchain inventory and mapping
We conduct a detailed inventory of your current DevSecOps tools. We map out the entire toolchain, including integrations and dependencies.

Best practices recommendations
We provide tailored recommendations to address identified gaps and suggest best practices for toolchain integration, automation, and security improvements.

Cost saving opportunities
We provide actionable recommendations for optimizing costs, while maintaining or enhancing performance.

Tool consolidation strategy
Where applicable, we recommend a strategy for consolidating tools to reduce complexity and improve efficiency.

Report and roadmap
We deliver a comprehensive report summarizing findings, gaps, and recommendations. We provide a roadmap for implementing the recommended improvements, including quick wins and long-term strategies.

Gap analysis
We Identify gaps in your current toolchain and processes. We highlight missing best practices and tools that could enhance your DevOps maturity.

Maturity assessment
We evaluate the maturity of your current DevOps Tool practices against industry best practices; assessing areas such as automation, integration, application security, release management, software currency, uptime, disaster recovery, etc. We use the **iTmethods Toolchain Maturity Model** to rate each aspect relative to our current customers and industry standards.
